

ASSOCIATION OF WOMEN'S BUSINESS CENTERS

March 19, 2018

Dear Members of Congress,

We, the undersigned, urge you to prioritize women business owners by strengthening and investing in the Women's Business Center program (WBC). We are a diverse group of more than 500 business owners, program supporters, and the 100 Executive Directors of WBC centers across the country. We are reaching out at a critical time for the Women's Business Center program as Congress considers modernizations to the program and its funding for Fiscal Year 2019.

Today, women's entrepreneurship continues to drive the economy forward and create sustainable jobs. More than 11 million women business owners now employ 9 million Americans, generating \$1.7 trillion in yearly revenues. Women are starting new businesses at five times the rate of men, increasing market share in every industry and in rural and urban areas alike. If American women entrepreneurs were our own country, we would have the 10th largest GDP in the world—larger than Canada or Mexico, and even Russia.

This significant growth relies on a national network of Women's Business Centers (WBCs) that provides training, counseling, mentoring and access to capital for women entrepreneurs. The WBC program is a public-private partnership with the Small Business Administration that leverages grants to operate more than 150 centers. These centers offer robust and tailored services to their population – from basic accounting to assistance applying for patents and winning government contracts.

The WBC program leaves an enormous footprint of successful business owners and job creators. In fiscal year 2016, WBCs reached more than 145,000 clients, conducting trainings in over 35 languages. This translated to more than 17,000 new businesses, 23,000 new jobs, nearly \$700 million in new revenues and \$429 million in private capital infusion. As taxpayers, we are proud of WBCs' astounding return on investment. Every federal dollar invested in the WBC program returns \$46 to the economy.

To continue this impressive growth, women entrepreneurs need the continued support of policymakers willing to foster an entrepreneurial environment that allows women to achieve their full economic potential. Specifically, we urge Members of Congress to fund the WBC program at \$18 million for FY2019 and pass key modernizations to the program advanced by the House and Senate Committee.

Two out every three new businesses will be started by a woman. Ensuring they succeed is the Congressional mandate of the WBC program, and we intend to fulfill it. We hope Congress will join us.

Sincerely,

Association of Women's Business Centers and these job-creating businesses across the country:
